

AN INVESTOR'S GUIDE TO THE NEW ZEALAND FOOD & BEVERAGE INDUSTRY

Part of the New Zealand Government's Food & Beverage Information Project; Feb 2014

www.foodandbeverage.govt.nz

iFAB 2014

The objective of this document is to make a strong, factual case for investment in the New Zealand food and beverage industry

- This investment can come from existing investors or those new to the sector
- This investment can come from global sources or New Zealand

The document acts as an “entry portal” to the wealth of further information available in on the sector in the New Zealand Government’s Food & Beverage Information Project

www.foodandbeverage.govt.nz

New Zealand is well positioned to triple its food & beverage exports over the next 15 years; investors will participate in this success

GENERAL

New Zealand is a developed, temperate-climate country in the Asia-Pacific region. It is a stable democracy with strong economic freedoms (Index of Economic Freedom #4), excellent investor protection (World Bank #1) and low corruption (Transparency International #1). It is by almost all measures the most attractive investment destination in the temperate zone of the Southern Hemisphere.

FOOD & BEVERAGE

Food and beverage exports are important to New Zealand and the country is a major F&B exporter (56% of exports). New Zealand's F&B exports are growing strongly and the country's export performance is strong and improving relative to peers.

The country has demonstrated capability in the production of temperate-climate food and beverages. It is the largest exporter in the world of dairy products and lamb and a major exporter of beef, kiwifruit, apples and seafood.

DRIVERS

The success of New Zealand in temperate foods is built around a natural environment conducive to agriculture. New Zealand – surrounded by the Pacific Ocean – has the light of Spain with the climate of Bordeaux. This climate will also moderate the effects of global warming going forward (relative to large continents).

The country's farmers are highly productive and efficient. The country has no agricultural subsidies and regulation is generally rational and light handed.

New Zealand has a supportive infrastructure for food and beverages along the total value chain.

New Zealand is a leader in food safety and product traceability. Customers and consumers around the world trust food and beverages produced in New Zealand.

In science, New Zealand spends more than half a billion dollars a year on Agri-food research across a wide range of areas, from fruit genetics to nutraceuticals. The country is also home to four major universities respected globally for their Agri-food research.

OPPORTUNITIES

While New Zealand is a major global F&B exporter, the country has significant untapped capacity to export more. New Zealand is a country the size of Italy with the population of Singapore. However Italy feeds a domestic population of 60m people and exports twice as much F&B as New Zealand.

The New Zealand Government has set a target of tripling the country's food and beverage exports over the next 15 years. This will be achieved through both growth of existing major sectors and the newer emerging growth stars.

New Zealand is a young country still discovering its comparative advantages and new industries continue to emerge. In the past twenty years New Zealand wine, honey, aquaculture and avocados have all emerged from almost nothing into world leading sectors.

New Zealand has attracted investment in F&B manufacturing from around the world. Global leaders have already endorsed New Zealand by investing in manufacturing in the country and 25% of the F&B manufacturing sector is foreign owned.

New Zealand is a developed, temperate-climate country in the Asia-Pacific region that is an attractive investment destination

New Zealand's success in food & beverages is underpinned by fundamental long term drivers

Drivers of success in F&B		Ingredients	Retail-Ready Products
Water rich overall Isolated island nation; pest/disease free status Counter-seasonal to the North Low intensity, free-range farming	Natural Resources	Dairy	Infant Formula Confectionery Ice Cream
Honest, ethical culture Educated/professional farmers & orchardists Deep farming knowledge & experience Universities with AgScience strength	Human Resources	Meat	Jams & Jellies Frozen Meals & Sides
Investing \$1b/year in bio-economy research World leader in dairy/pastoral R&D Ag. R&D at scale at Crown Research Institutes	Science & Technology	Seafood	Soups & Sauces Pasta Products Breakfast Cereal
Strong food safety standards & systems Robust biosecurity & border control Respected sustainable fisheries management	Supportive Government	Fruit & Vegetables	Biscuits & Other Baked Pet Foods
		Specialty Grains	Nutraceuticals Innovative Foods Beverages

As a result of being an island nation with strong biosecurity controls, New Zealand is free of a wide range of animal diseases; this leads to higher yields and excellent market access

Species	Major global diseases	
	Present in New Zealand	Not present in New Zealand (select)
Cattle	Bovine TB Johne's Disease	Foot-and-mouth Bovine Spongiform encephalopathy (BSE) Bovine Brucellosis
Sheep	Footrot	Scrapie Foot-and-mouth Blue tongue

The Food and Beverage Information Project

The Food & Beverage Information Project is the first comprehensive overview of the state of New Zealand's Food & Beverage (F&B) industry. Part of the Government's Business Growth Agenda (BGA), it is an integrated programme of work focusing on the six key inputs businesses need to succeed, grow and add jobs; export markets, capital markets, innovation, skilled and safe workplaces, natural resources and infrastructure.

Essentially, the BGA Export Markets goal will require lifting the ratio of exports from today's rate of 30% of GDP to 40% by 2025. This equates to doubling exports in real terms (or tripling exports in nominal non-inflation adjusted terms). This in turn equates to achieving a 7% per annum growth rate over the next twelve years.

This five-year project analyses the main sectors in F&B, including dairy, meat, seafood, produce, processed foods, and beverages, as well as providing an overview of how the industry is fairing in our major markets. It also conducts in-depth sector reviews on a rotating basis. The information is updated annually and feedback from users shows the project is acting as a vital tool for companies looking to expand and grow exports.

Why Food & Beverage?

The Food & Beverage industry is vitally important to the New Zealand economy. Food & Beverage accounts for 56% of our merchandise trade exports and one in five jobs across the wider value chain. In addition, F&B acts as a vital ambassador for the country, being in most cases the first exposure global consumers get to "Brand New Zealand."

New Zealand's F&B exports are growing strongly and the country's export performance is strong and improving relative to peers. In the 15 years leading up to 2010, New Zealand's food and beverage exports grew at a compound annual rate of 7% per annum. So one way to look at the challenge is to ask - can we continue to grow our food & beverage exports at the same rate? To understand if this is possible we need to know what has been driving our success.

What is the purpose of the food and beverage information project?

The project pulls together the available information on the food and beverage industry into one place, in a form which is familiar and useful to business. The reports contain analysis and interpretation of trends and opportunities to materially assist with business strategy and government policy.

The information will be of vital use to businesses, investors, government, and research institutions as the industry expands and diversifies. This industry view will be very useful to government, enabling better dialogue and the opportunity to address issues collectively.

What benefit will this bring to businesses?

The Project will have many uses for businesses. These include:

- As a base of market intelligence to enable business to be much more targeted in their own market research
- Reviewing and informing offshore market development (including export and investment) strategies
- Assisting in identifying areas of innovation and R&D for the future
- Identifying strategic partners and collaborators
- Enabling a company to benchmark performance with that of its competitors
- Monitoring industry activity
- Gaining a better understanding of their own industry sector
- Identifying internal capability needs or external inputs

How will government use the reports?

This information will provide much greater insight into the industry, which is useful for a range of policy developments, from regulatory frameworks to investment in science and skills and facilitating access to international markets. In particular, a single source of factual information will enable government agencies to better coordinate their efforts across the system and be more responsive to addressing industry issues.

iFAB 2014

Coriolis is a boutique management consulting firm that focuses on food, consumer packaged goods, retailing and foodservice.

Coriolis advises clients on strategy, operations, organization, and mergers and acquisitions. We develop practical, fact-based insights grounded in the real world that guide our clients decisions and actions. Founded in 1999, Coriolis is based in Auckland, New Zealand and works on projects across the Asia Pacific region.

WHAT WE DO

We help our clients assemble the facts needed to guide their big decisions. We make practical recommendations. Where appropriate, we work with them to make change happen.

HOW WE DO IT

Our style is practical and down-to-earth. We try to put ourselves in our clients' shoes and focus on actions. We listen hard, but we are suspicious of the consensus. We provide an external, objective perspective. We are happy to link our fees to results.

WHO WE WORK WITH

We only work with a select group of clients we trust. We build long term relationships with our clients and more than 80% of our work comes from existing clients. Our clients trust our experience, advice and integrity.

Typical assignments for clients include...

FIRM STRATEGY & OPERATIONS:

We help clients develop their own strategy for growing sales and profits. We have a strong bias towards growth driven by new products, new channels and new markets.

MARKET ENTRY

We help clients identify which countries are the most attractive – from a consumer, a competition and a channel point-of-view. Following this we assist in developing a plan for market entry and growth.

VALUE CREATION

We help clients create value through revenue growth and cost reduction.

TARGET IDENTIFICATION

We help clients identify high potential acquisition targets by profiling industries, screening companies and devising a plan to approach targets.

DUE DILIGENCE

We help organisations make better decisions by performing consumer and market-focused due diligence and assessing performance improvement opportunities.

EXPERT WITNESS

We provide expert witness support to clients in legal cases and insurance claims. We assist with applications under competition/fair trade laws and regulations.
